PROFESSIONAL SUMMARY

Software Engineer with ~2 years of experience building production web applications with the **MERN stack, Next.js, and PostgreSQL**, and delivering **AI-agent and workflow-automation solutions** for client projects. Own features end-to-end — API and database design through Dockerized deployment — with hands-on experience integrating **LLM APIs (Claude)** and agent observability tooling (**Langfuse**). Ranked 1st in undergraduate Computer Science department.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Responsive UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Nodemailer, Multer

Databases: MongoDB (Mongoose), PostgreSQL, SQL

AI & Automation: AI Agents, Agentic Workflows, LLM Integration (Claude API), Prompt Engineering, Langfuse (LLM Observability), Vercel AI SDK, AI agent orchestration,

Tools & DevOps: Git, GitHub, Docker, VS Code, Vercel, Claude, Cursor

Programming: JavaScript, Python, SQL

EXPERIENCE

Junior Software Engineer — Belsterns Technologies Chennai | Jan 2025 – Present

- Develop and ship full-stack features for client web applications using **Next.js and PostgreSQL**, deployed in Dockerized environments.
- Develop features for an online Testing management platform Eztest using **Next.js and PostgreSQL**; build AI-agent based task orchestration and intelligent process automation for business workflows.
- Design and build **AI-agent workflows** that automate client reporting and business processes — integrating **Claude LLM APIs**, orchestrating multi-step agent tasks, and monitoring agent behavior with **Langfuse**.
- Lead client modules end-to-end: requirements analysis, API and database design, implementation, and release, collaborating with cross-functional teams to meet delivery timelines.
- Reduced manual reporting effort for clients by replacing repetitive workflows with automated agent pipelines.

Software Development Engineer Intern — Belsterns Technologies Chennai | Sep 2024 – Jan 2025

- Built and optimized responsive web applications in the **MERN stack and Next.js** for client-facing projects.
- Contributed to Client based projects using Next JS; promoted to full-time Junior Software Engineer within 4 months.

PROJECTS

Home Rental Platform — MERN Stack Jul 2024

- Built a rental booking system with full CRUD, availability calendar, **JWT authentication**, automated email notifications (Nodemailer), and image uploads (Multer).

Real Estate Listing Platform — MERN Stack Mar 2024

- Created a property listing platform with multi-criteria search filters (location, price, property type), secure auth, and REST APIs with Express and MongoDB.

EDUCATION

Master of Computer Applications (MCA) — Kongu Engineering College, Perundurai 2023 – 2025 | CGPA: 8.4

B.Sc. Computer Science — Government Arts & Science College 2020 – 2023 | CGPA: 7.57

- **Achievement:** Ranked 1st in the Undergraduate Computer Science Department.
